

VOLVO CONSTRUCTION EQUIPMENT

LUBRICANTS

VOLVO

Advantages Volvo lubricants

1 Volvo Diesel Engine Oils

- Reduce the oil and fuel consumption due to low friction.
- Keep the engine clean, even in tough operating conditions.
- Reduce engine wear and give longer engine service life.

2 Volvo Super Hydraulic Oils

- Offer excellent anti-wear characteristics.
- Fulfil the strictest filtration requirements from hydraulic pump manufactures (OEM's).
- Prevent corrosion.
- Have good oxidation stability for longer oil service life.
- Improve lubrication capacity due to minimal foaming.

3 Volvo Transmission Oils

- Protect equipment on included components.
- Reduce friction and wear.
- Give longer service life due to excellent lubricating characteristics.

Volvo lubricants protect your machine

Volvo Construction Equipment offers a wide range of high quality lubricants, specially developed for Volvo machines in today's demanding operating conditions.

For the best overall economy, always change oil filters when changing oil. Always use Volvo lubricants in combination with genuine Volvo filters.

Be just as demanding when selecting lubricants as you were when you bought your machine

Volvo lubricants are a guarantee for maintaining your Volvo machine's performance and good overall economy. The lubricants are specially tested for Volvo machines according to specifications from Volvo Construction Equipment, and therefore meet the strictest requirements for safety and quality.

Lower fuel consumption also helps to reduce carbon dioxide emissions, which contributes to protecting the environment.
