

Volvo Group and OFTP2

Due to the closing of X.25 and ISDN Volvo Group has decided to migrate all EDI partners using OFTP over X.25 and ISDN to OFTP2 over TCP/IP. The using of OFTP2 will also reduce cost and increase performance, especially for CAD files. Volvo IT will discontinue supporting X.25 by the end of June 2010 and ISDN by the end of 2010.

An OFTP2 Migration project at Volvo IT is working to carry out this task. The project is now in the phase to start run pilots with suppliers. If you are interested to participate as a pilot please contact us at oftp2@volvo.com. If your EDI-system doesn't support OFTP2 please contact your system supplier to get support for OFTP2.

Mass migration will start in November 2009. Each EDI partner connected to Volvo Group using OFTP over X25 or ISDN will be contacted by mail with more information regarding how to migrate. Please notify our support organisation if your EDI contact person has been changed recently.

How will Volvo Group use OFTP2

AB Volvo will implement session level encryption by using Transport Layer Security (TLS). The TLS provides data confidentiality by encryption of all protocol commands and data exchanged between Volvo Group and our partners. This will provide enough security, preventing a third party from extracting any useful information from the transmission.

AB Volvo will not use OFTP2-functionality for file encryption, signing and compression.

The suppliers need to have a SSL certificate issued by a certificate authority approved by Volvo. For the approved CA list and the Volvo Group OFTP2 parameter see next page or at our EDI homepage:

<http://www.volvo.com/volvoit/edi/en-gb/Europe/communication/communication.htm>

For questions regarding OFTP2 at Volvo Group please contact the OFTP2 Migration project: oftp2@volvo.com

Volvo Group OFTP2 Parameter
