

VOLVO CONSTRUCTION EQUIPMENT

UNDERCARRIAGE PARTS

VOLVO

Genuine Volvo undercarriage parts tailored for your machine

The best choice

Every genuine Volvo undercarriage part is designed and engineered with unique characteristics. This means that every part is built specifically to handle the type of wear and loading forces that are generated when operating the machine.

Your Volvo Construction Equipment dealer is able to offer you top quality products with fast deliveries combined with well-equipped workshops and competent service technicians.

Lower operating cost

Every contractor strives to make the undercarriage last as long as possible. It is all about operating cost – but it may have the opposite effect. An undercarriage in poor condition reduces machine safety and stability, increases fuel consumption when travelling, shortens machine life and increases the risk of unplanned downtime.

Let your local Volvo Construction Equipment dealer perform a condition test of your machine's undercarriage at regular intervals to get the best performance, prevent unnecessary downtime and ensure lowest operating cost.

With genuine Volvo undercarriage parts you get consistent, high quality at the right price.

Genuine Volvo undercarriage parts give you:

- A complete system designed for your machine
- Consistent high quality
- High parts availability and fast deliveries
- Access to well-equipped workshops with high overhaul capacity and skilled personnel
- Competitive products with long service life
- Lowest operating cost

Genuine Volvo undercarriage parts for your machine

Applicable to Volvo, Samsung and Åkerman excavators, heavier than eleven tons from and incl. model year 1992.

Let your Volvo remain a Volvo—with genuine Volvo parts

Volvo undercarriage is designed as an integral part, to enhance the performance of the whole machine.

Each individual part works in perfect harmony with the others. Only by using genuine parts can you be sure that the machine retains its original qualities and features.

When you choose genuine Volvo undercarriage parts, installed by a trained Volvo dealer, you know that the machine will function as a complete unit in the future as well. Down to the smallest detail.
