Engine flushing kit

QL Neutra-Salt

The new QL Neutra-Salt Engine Flushing System is now available for installation on all engines, inboards and sterndrives. This system is designed for both freshwater- and saltwater-cooled engines that have an engine driven raw-water pump. As a saltwater boater, you're continually challenged of salt — both inside and outside your engine — particularly when the boat is sitting unused in the water. Now, with the installation and use of the QL Neutra-Salt Engine Flushing System, you have an effective and simple solution to combat internal corrosion and help extend the life of your engine.

How it works

To operate, simply engage the "Flush" switch by pushing and holding the dash-mounted switch for 45 seconds while running the engine at idle speed, making sure the engine has an adequate supply of raw water.

Once the Flush switch is engaged, the Neutra-Salt concentrate solution will be injected into the cooling system, leaving a corrosion-inhibiting coating on all metal surfaces, thereby neutralizing the salinity of incoming seawater.

Before disengaging the Flush switch, you must turn off the engine.

For best results, use the QL NeutraSalt Engine Flushing System after every trip outing. Boat owners will typically get 10 to 15 flushes before a refill is needed.

Kit includes:

One quart of QL Neutra-Salt motor flushing concentrate, 3-quart reservoir with mounting bracket, eight feet of hose, raw-water inlet tee fitting, connecting hose for power-steering cooler, hose clamps, momentary on rocker "Flush" switch, wiring harness with fuses, and solenoid.

Features:

- Flushes your engine while the boat is sitting in the water — there is no need to trailer your boat or hook up to a freshwater supply in order to flush and protect your engine
- Helps protect your engine from saltwater damage
- Helps prevent corrosion by removing salt deposits, leaving a protective corrosion inhibitor on all metal surfaces, including: Power-steering and oil cooler, engine block, exhaust manifold and risers, thermostat housing, circulating and raw-water pumps
- Installs easily and operates smoothly.
